

MD. IFTEKHAR ALI

Software Engineer | Full-Stack Developer | Cloud and DevSecOps

+880 1521-429852 | iftekhar.priyo12345@gmail.com | [LinkedIn](#) | [Github](#) | [Blogs](#) | Dhaka, Bangladesh

PROFESSIONAL SUMMARY

Software Engineer with five years of experience delivering production-grade web, mobile, content management, and API-driven applications for a Japanese software company in a remote, cross-functional environment. Experienced across the full software development lifecycle, from designing and implementing features to maintaining and improving live systems. Currently developing expertise in cloud infrastructure, DevOps, system design, and cybersecurity through hands-on projects, with a Master of Cybersecurity at Universiti Teknologi Malaysia commencing in October 2026.

CORE TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Rust, Bash

Frontend: React, Next.js, React Native, Tailwind CSS, Apollo Client, SEO

Backend: Node.js, Express, NestJS, GraphQL, Apollo Server, REST APIs, gRPC, BFF and microservice patterns

Databases: PostgreSQL, MySQL, Prisma ORM, Neon

Cloud and DevOps: Amazon Web Services, Google Cloud Platform, Terraform, Github Actions, Prometheus, Grafana

Additional: Git, Docker, Linux, LLM Integration

PROFESSIONAL EXPERIENCE

Software Engineer | Younode, Inc.

Oct 2021 - Mar 2026

Sapporo, Japan (Remote)

- Developed and maintained production frontend and backend features for music, content-management, chatbot and administrative platforms serving Japanese and international clients.
- Built reusable user interfaces and application workflows with React, Next.js and React Native, and integrated GraphQL, REST and gRPC-based services.
- Contributed to backend and BFF services using NestJS, Express, Apollo Server and related Node.js technologies.
- Supported feature planning, code reviews, debugging, testing, maintenance, deployment and cross-functional remote collaboration.
- Delivered solutions for Shiseido, Criteo, Japan Triathlon and other client and in-house products.

Software Engineer Intern | Younode, Inc.

Mar 2021 - Sept 2021

Sapporo, Japan (Remote)

- Contributed to the Pulp music social-networking product while developing production engineering, Git workflow and remote collaboration skills.
- Supported frontend implementation, testing, bug fixes and ongoing application maintenance before moving into a full-time engineering role.

SELECTED PROFESSIONAL PROJECTS

Pulp - Music Social Network | React Native, GraphQL, Apollo, gRPC

- Developed core mobile functionality and UI/UX for a social platform where users share Spotify listening activity, posts and comments.
- Built and maintained a dedicated BFF service with Apollo Server and gRPC, and supported iOS distribution through Xcode Cloud, App Store Connect and TestFlight.

Shiseido LINE Chatbot | LINE Messaging API, LINE Bot SDK, NestJS

- Developed customer purchase flows and chatbot functionality for a Japan-wide Shiseido service within the LINE application.

- Implemented frontend experiences and contributed to backend services and ongoing production maintenance.

SELECTED PERSONAL AND CLOUD PROJECTS

DevLog - Personal Technical Publishing Platform | Next.js, Express, PostgreSQL, Prisma, AWS

- Built and deployed separate frontend and backend applications on an AWS EC2 instance using Linux, Nginx and PM2, with a custom domain and DNS configuration.
- Implemented PostgreSQL data storage with Neon and Prisma, plus an event-driven image-processing workflow using Amazon S3 and AWS Lambda.
- Configured a GitHub Actions deployment workflow and published beginner-friendly articles about AWS, cloud infrastructure, DevOps, system design and cybersecurity.

[Repo](#) [Live](#)

VS Code Voice Assistant | VS Code Extension, whisper.cpp, Local AI

- Built and published an early VS Code extension that records voice instructions and converts speech to text locally using whisper.cpp.
- Designed the tool around privacy, local-first processing and faster prompt preparation for Codex and other AI coding assistants.

[Repo](#) [Live](#)

Sanymar - AI Radio-Jockey Application (In Development) | Spotify API, Ollama, Qwen, Kokoro TTS

- Developing a desktop application that generates short, radio-style commentary between Spotify song transitions.
- Integrated a locally hosted Qwen language model through Ollama to generate contextual commentary based on the currently playing music.
- Implemented Kokoro TTS to convert generated commentary into natural-sounding voice output.

[Repo](#) Internal Testing

EDUCATION

Master of Cybersecurity | Universiti Teknologi Malaysia (UTM)

Johor Bahru, Malaysia

Starts Oct 2026

BSc in Computer Science and Engineering | North South University

Dhaka, Bangladesh

2017 - 2022

Certifications

AWS Certified Solutions Architect - Associate: In progress

ADDITIONAL INFORMATION

English proficiency: PTE Academic - 85 (Expert)

Availability: Open to remote part-time, contract, freelance or suitable full-time software and cloud-related opportunities
